Self-Taught Software Developer	**Jun. 2017 – Present**
Javascipt, React/Next.js, Vue/Nuxt.js, Node, Swift, SwiftUI	*Las Vegas, Nevada*

Experience

Cascade Financial Technology **Jan 2021 – July 2023**
Software Engineer *Las Vegas, NV*

- As a Frontend Developer at Cascade Financial, I played a pivotal role in delivering high-quality web and iOS applications using Vue.js with Nuxt.js and Swift with SwiftUI. I collaborated with cross-functional teams and actively contributed to the development process from start to finish.
- Worked on assigned tickets in Jira, utilizing Vue.js for web applications and SwiftUI for iOS development, implementing new features and resolving bugs.
- Assisted colleagues by providing support and guidance on coding issues, fostering a collaborative environment focused on efficient problem-solving.
- Conducted thorough code reviews of GitHub pull requests from other developers, offering constructive feedback to maintain code quality and adherence to best practices.
- Performed GitHub merges to integrate approved changes into the main codebase, ensuring a smooth and organized development workflow.
- Collaborated closely with the backend team and design team to ensure seamless integration and proper implementation of features, actively participating in discussions and providing technical insights.

Bellagio **Aug 2014 – Dec 2020**
Bartender's Assistant *Las Vegas, NV*

- Working together with numerous bartenders in providing exceptional guest service experience while also ensuring the bar is stocked before, while, and after the bar closes. Day to day always changes as an assistant so you must adapt to any situation or challenge.
- Building a one on one rapport with employees as well as guests.
- Exceptional organizational skills in a high volume environment.
- Face challenging tasks with calmness and determination.

Projects

QuillFire – Content Publishing App | *Javascript, Next.js, GoogleAuth, MongoDB*

- Quill Fire is a web application built with Next.js. It provides a user-friendly, feature-rich writing environment for authors and content creators to share their stories, ideas, or opinions. Users can Search, publish, and comment on stories created by other users or their own.

What 2 Tip — Gratuity App | *Javascript, ReactJs, Semantic UI, FireBase, Google Places API*

- A gratuity suggestion app that gives you the recommended gratuity based on the user experience in a 5 star rating system. Gives the option to leave a review of the said restaurant (using Google Places API) and provides reviews by other users if available.

What's The Weather Like? — Weather App | *Javascript, ReactJs, OpenWeather API*

- A PWA weather app created with the Open Weather API. Features daily forecast every hour and five day forecast. Color changing background depending on the type of weather and day or night.(Mobile Only)

Savoureux Steakhouse | *Javascript, ReactJs, Framer Motion, EmailJs*

- Modern Restaurant website concept created in ReactJs. Features functional reservations and contact page components with emailJs.
